

PSE Power Systems

Electrical Engineering Specialists

OVER 25 YEARS OF COMMITMENT TO EXCELLENCE AND CUSTOMER SERVICE

The key to the long-term value of any investment in power generation is the maintenance programme that accompanies it. Without proper care and attention from trained professionals, the most well built system will eventually have compromised reliability.

PSE Power Systems has 25 years experience in the maintenance and servicing of every

type of generator and energy system on the market today. Working 24/7 throughout the Island of Ireland, PSE Power Systems offers you the support and expertise that will give you confidence in your investment.

From planned maintenance to trouble-shooting to the provision of emergency power, PSE Power Systems is your only choice for service, expertise and support.

Generating ENERGY Solutions

Uninterruptable Power Supplies

Compact CHP

Gas / CHP & Diesel Generators

How GREEN is your UPS?

96%*

*Certified by TÜV SÜD.

NEW GREEN POWER RANGE

Pub. 06/2013

€ Cost savings (TCO)

- High efficiency with very low CO₂ impact
- Reduced footprint with 12% more (kW)

∞ Availability

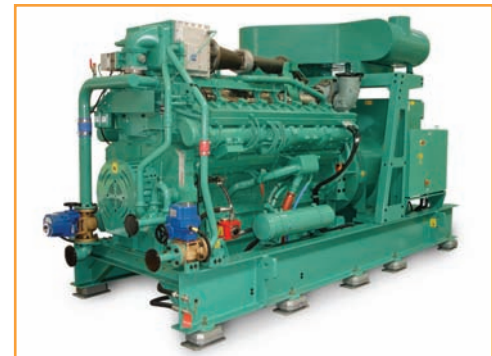

- True double-conversion protection
- Redundant and resilient configurations

☀ Technology

- Optimised battery lifetime
- Flywheel UPS – No battery

SOKRATHERM CHP compact modules reach an overall efficiency of 91%. They have won independent energy & technology awards throughout Europe with hundreds of successful installations. PSE are proud to offer the SOKRATHERM range to Ireland and are confident they will greatly benefit Irish businesses in their quest to reduce energy costs.

Cummins Power Generation generator sets are the heart of any on-site power system. Generator sets include a prime mover fueled by diesel, natural gas or propane, and an alternator that provides power at 50 Hz or 60 Hz, depending on the application. PowerCommand™ models and our digital master control facilitate paralleling with other generators or the power grid. Our generator sets are the result of integrated design and manufacturing intended to meet your requirements for reliability, power quality, rated performance, and efficient operation.
